Wayne County Schools District Wellness Policy

Preamble

Wayne County School District is committed to the optimal development of every student. The District believes that for students to have the opportunity to achieve personal, academic, developmental and social success, we need to create positive, safe and health-promoting learning environments at every level, in every setting, throughout the school year.

Research shows that two components, good nutrition and physical activity before, during and after the school day, are strongly correlated with positive student outcomes.

This policy outlines the District's approach to ensuring environments and opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. Specifically, this policy establishes goals and procedures to ensure that:

- Students in the District have access to healthy foods throughout the school day – both through reimbursable school meals and other foods available throughout the school campus– in accordance with Federal and state nutrition standards;
- Students receive quality nutrition education that helps them develop lifelong healthy eating behaviors;
- Students have opportunities to be physically active before, during and after school;
- Schools engage in nutrition and physical activity promotion and other activities that promote student wellness;
- School staff are encouraged and supported to practice healthy nutrition and physical activity behaviors in and out of school;
- The community is engaged in supporting the work of the District in creating continuity between school and other settings for students and staff to practice lifelong healthy habits;
- The District establishes and maintains an infrastructure for management, oversight, implementation, communication about and monitoring of the policy and its established goals and objectives
- The District will coordinate the wellness policy with other aspects of school management, including the District's School Improvement Plan, when appropriate.

This policy applies to all students, staff and schools in the District. Specific measurable goals and outcomes are identified within each section below.

I. School Wellness Committee

Committee Role and Membership

- The District will convene a representative district wellness committee (DWC) that meets at least four times per year to establish goals for and oversee school health and safety policies and programs, including development, implementation and periodic review and update of this district-level wellness policy (heretofore referred as “wellness policy”).
- Each school within the District will establish an ongoing School Wellness Committee (SWC) that convenes to review school-level issues, in coordination with the DWC.

The DWC membership will represent to the extent possible all school levels and include, but not be limited to: parents and caregivers, students, representatives of the school nutrition program, social and mental health service staff, physical and health education teachers, school health services, school administrators, school board members, health professionals and the general public. To the extent possible, the DWC will represent diversity from each school building and from the community.

Leadership

The Superintendent or designee(s) will convene the DWC and facilitate development of and updates to the wellness policy, and will ensure each school’s compliance with the policy.

All school-sponsored events will adhere to the wellness policy guidelines. All school-sponsored wellness events will include physical activity and healthy eating opportunities when appropriate.

The Principal at each school will ensure compliance with the District Wellness Policy.

Wellness Policy Implementation, Monitoring, Accountability and Community Engagement

Implementation Plan

The District will develop and maintain a plan for implementation to manage and coordinate the execution of this wellness policy. The plan delineates roles, responsibilities, actions and timelines specific to each school; and includes information about who will be responsible to make what change, by how much, where and when; as well as specific goals and objectives for nutrition standards for all foods and beverages available on the school campus, food and beverage marketing, nutrition promotion and education, physical activity, physical education and other school-based activities that promote student wellness. All schools will use the [Healthy Schools Program online tools](#) to complete a school-level assessment based on the Centers for Disease Control and Prevention’s School Health Index, create an action plan that fosters implementation and generate an annual progress report.

This wellness policy and the progress reports can be found at: www.wayne.kyschools.us.

Recordkeeping

The District will retain records to document compliance with the requirements of the wellness policy on the www.wayne.kyschools.us– Quick Link. Documentation maintained in this location will include but will not be limited to:

- The written wellness policy;
- Documentation demonstrating that the policy has been made available to the public;
- Documentation of efforts to review and update the Local Schools Wellness Policy; including an indication of who is involved in the update and methods the district uses to make stakeholders aware of their ability to participate on the DWC;
- Documentation to demonstrate compliance with the annual public notification requirements;
- The most recent assessment on the implementation of the local school wellness policy;
- Documentation demonstrating the most recent assessment on the implementation of the Local School Wellness Policy has been made available to the public.

Annual Notification of Policy

Each year the district will make information about this policy, including its content, any updates to the policy and implementation status available through the school website. The District will provide as much information as possible about the school nutrition environment. Additionally adding how the public can become involved with the school wellness committee.

Triennial Progress Assessments

At least once every three years, the District will evaluate compliance with the wellness policy to assess the implementation of the policy and include:

- The extent to which schools under the jurisdiction of the District are in compliance with the wellness policy;
- The extent to which the District's wellness policy compares to the Alliance for a Healthier Generation's model wellness policy; and
- A description of the progress made in attaining the goals of the District's wellness policy.

The position/person responsible for managing the triennial assessment and contact information is **Food Service Director.**

The DWC, in collaboration with individual schools, will aide in monitor schools' compliance with this wellness policy.

Triennial assessment will be available on school website site.

Revisions and Updating the Policy

The DWC will update or modify the wellness policy based on the results of the annual School Health Index and triennial assessments and/or as District priorities change; community needs change; wellness goals are met; new health science, information, and technology emerges; and new Federal or state guidance or standards are issued. **The wellness policy will be assessed and updated as indicated at least every three years, following the triennial assessment.**

Community Involvement, Outreach and Communications

The district is committed to being responsive to community input, which begins with awareness of the wellness policy. The district website will be used for outreach encouraging community involvement and support with local wellness district school initiatives.

The District will actively notify the public about the content of or any updates to the wellness policy annually. The District will inform the community about the availability of the annual and triennial reports.

II. Nutrition

School Meals

Children need access to healthful foods and opportunities to be physically active in order to grow, learn, and thrive. The school meals program aims to improve the overall health of school children in preparation to learn and succeed in life by supporting and modeling healthy choices. School meals are an integral part of the education system because good health fosters student attendance and education. Wayne County Schools offer a selection of daily choices at all grade levels, empowering students to make their own healthy food choices.

Schools within the District participate in USDA child nutrition programs, including the National School Lunch Program (NSLP), the School Breakfast Program (SBP), and the Fresh Fruit & Vegetable Program (FFVP), Summer Food Service Program (SFSP), and the At-Risk Supper program (CACFP). All schools within the District are committed to offering school meals through the NSLP and SBP programs, and other applicable Federal child nutrition programs, that:

- Are accessible to all students;
- Are appealing and attractive to children;
- Are served in clean and pleasant settings;
- Meet or exceed current nutrition requirements established by local, state, and Federal statutes and regulations. (The District offers reimbursable school meals that meet [USDA nutrition standards](#).)
- Encourage healthy food and beverage choices using at least ten of the [Smarter Lunchroom techniques](#)
- Menus will be posted on the District website or individual school websites, and will include nutrient content and ingredients.
- Menus will be created/reviewed by a Registered Dietitian or other certified nutrition professional.
- School meals are administered by a team of child nutrition professionals.
- The District child nutrition program will accommodate students with special dietary needs.
- Students will be allowed at least 10 minutes to eat breakfast and at least 20 minutes to eat lunch, counting from the time they have received their meal and are seated (meets Healthy Schools Program Gold-level criteria).
- Students are served lunch at a reasonable and appropriate time of day.
- Encourage recess before lunch to better support learning and healthy eating.
- Participation in Federal child nutrition programs will be promoted among students and families to help ensure that families know what programs are available in their children's school.
- The District will implement at least four of the following five Farm to School activities (meets Healthy Schools Program Gold-level criteria; the activities the District plans to do):
 - Local and/or regional products are incorporated into the school meal program;
 - Messages about agriculture and nutrition are reinforced throughout the learning environment;
 - School hosts a school garden;
 - School hosts field trips to local farms; and
 - School utilizes promotions or special events, such as tastings, that highlight the local/ regional products.

School Meals Average Daily Participation

The school meal program aims to reach all students. There have been several advancements of Healthy School Meals for all through federal and state legislation and community eligibility. At the school level, best practices to increase participation should be used, such as:

- implementing innovative breakfast models (kiosk)
- ensuring enough time for students to eat (minimum of twenty minutes)
- serve high-quality, appealing meals
- breakfast options after the bell (second chance)
- Child Nutrition Program will offer student surveys about menu offerings
- creative food names
- Morning bus will be scheduled to allow students to arrive to school in time for breakfast. In the event of bus delays, the child nutrition program will offer breakfast to all student after late arrival.
- The district shall use the USDA Smarter Lunchroom tools and other resources available on the USDA website

Staff Qualifications and Professional Development

All school nutrition program directors, managers and staff will meet or exceed hiring and annual continuing education/training requirements in the [USDA professional standards for child nutrition professionals](#). These school nutrition personnel will refer to [USDA's Professional Standards for School Nutrition Standards website](#) to search for training that meets their learning needs.

Water

To promote hydration, free, safe, **plain** drinking water will be available to all students throughout the school day* and throughout every school campus*. The District will make drinking water available where school meals are served during mealtimes. If drinking fountain is not present other sources and containers may include water jugs, hydration stations, and other methods for delivering drinking water. Students will be encouraged to carry (approved) water bottles filled with only water with them throughout the day.

Competitive Foods and Beverages

School Day Windows:

Window 1--From 12 AM (midnight) until 30 minutes after the last lunch period. In this window no sale of food or beverage may take place except as part of the school breakfast or school lunch program.

Window 2—Opens 30 minutes after the last lunch period and closes 30 minutes after the official school day ends. In this window all food or beverages sold must meet Smart Snacks Regulations. (www.healthiergeneration.org/take_action/schools/snacks_and_beverages/smart_snacks/alliance_product_calculator)

Window 3—Opens 30 minutes after the end of the official school day and closes at 12 AM (midnight). During this window, there is no nutrient standard restriction however to promote healthy eating habits one healthy option at each event is encouraged.

Elementary/Middle School Beverage Options: (Window 2)

- Water—**Plain**, non-caloric, noncarbonated water. No size limit.
- Milk—Low-fat (unflavored only) or nonfat milk (flavored or unflavored) Size restrictions--Elementary (8 ounces or less) Middle (12 ounces or less).
- Juice—100% fruit or vegetable juice or any combination of both totaling 100% with no added sweeteners will be allowed. Size restrictions--Elementary (8 ounces or less) Middle (12 ounces or less).
- No other beverage are allowed.

High School Beverage Options: (Window 2)

- Water—**Plain**, non-caloric, noncarbonated water. No size limit.
- Milk—Low-fat (unflavored only) or nonfat milk (flavored or unflavored) Size restrictions--(12 ounces or less).
- Juice—100% fruit or vegetable juice or any combination of both totaling 100% with no added sweeteners will be allowed. Size restrictions--(12 ounces or less).
- Calorie free beverages—any flavored beverages (20 ounces or less) that are labeled to contain 5 calories or less per 8 ounces, or 10 calories or less per 20 ounce; and contains no more than 10 grams of sugar per serving.
- Low calorie beverages—any flavored beverages (12 ounces or less) that are labeled to contain 40 calories or less per 8 ounces, or 60 calories or less per 12 ounce; and contains no more than 10 grams of sugar per serving.
- Beverage may contain caffeine however it is encouraged for school to limit the sale of beverages with caffeine.

Celebrations and Rewards

1. Celebrations/parties and Classroom snacks. The district will provide a list of healthy ideas to parents and teachers, including non-food celebration ideas. Healthy party and snack ideas are encouraged from the [Alliance for a Healthier Generation](#) and from the [USDA](#).
2. Rewards and incentives. The District will provide teachers and other relevant school staff a [list of alternative ways to reward children](#) and encourage them to use these best practice non-food methods as alternatives to food and beverages. Also, no foods or beverages will be withheld as punishment for any reason.
3. Early Learning Center Snack Program: Parents order healthy snacks from the Child Nutrition Department. They choose from a list that are approved Smart Snack compliant options. The parents pay for the snacks and the Child Nutrition Department delivers the snacks to the classrooms. This ensures snacks provided to the students meet smart snack compliance.

Outside Food

The District encourages all children to consume the meals provided by the district. The meals provided are healthy, attractive and children have choices within each school cafeteria. Bringing food in to children from outside restaurants has a negative impact on the children around them and a negative impact on the health of the child receiving the meal. Although children are

allowed to bring their lunch, elementary student lunch bags should omit any items containing peanut or tree nut products. **Outside restaurants food** brought by guardians/deliver drivers are not permitted within the school district.

Fundraising

There will be no exemptions given for fundraisers. All foods sold in window 2 must meet Smart Snack Regulations. During window 3, there is no nutrient standard restriction however to promote healthy eating habits one healthy option at each event is encouraged. (See school day windows)

Nutrition Promotion

Nutrition promotion and education positively influence lifelong eating behaviors by using evidence-based techniques and nutrition messages, and by creating food environments that encourage healthy nutrition choices and encourage participation in school meal programs. Students and staff will receive consistent nutrition messages throughout schools, classrooms, gymnasiums, and cafeterias. Nutrition promotion also includes marketing and advertising nutritious foods and beverages to students and is most effective when implemented consistently through a comprehensive and multi-channel approach by school staff, teachers, parents, students and the community.

Nutrition Education

The District will teach, model, encourage and support healthy eating by all students. Schools will provide nutrition education and engage in nutrition promotion that:

- Is designed to provide students with the knowledge and skills necessary to promote and protect their health;
- Is part of not only health education classes, but also integrated into other classroom instruction through subjects such as math, science, language arts, social sciences and elective subjects;
- Includes enjoyable, developmentally-appropriate, culturally-relevant and participatory activities, such as cooking demonstrations or lessons, promotions, taste-testing, farm visits and school gardens;
- Promotes fruits, vegetables, whole-grain products, low-fat and fat-free dairy products and healthy food preparation methods within the cafeteria and school.
- Emphasizes caloric balance between food intake and energy expenditure (promotes physical activity/exercise);
- Links with school meal programs, cafeteria nutrition promotion activities, school gardens, Farm to School programs, other school foods and nutrition-related community services;
- Teaches media literacy with an emphasis on food and beverage marketing; and
- Includes nutrition education training for teachers and other staff.

Essential Healthy Eating Topics in Health Education

The District will include in the health education curriculum a minimum of 12 of the following essential topics on healthy eating:

- Relationship between healthy eating and personal health and disease prevention
- Food guidance from [MyPlate](#)
- Reading and using FDA's nutrition fact labels
- Eating a variety of foods every day

- Balancing food intake and physical activity
- Eating more fruits, vegetables and whole grain products
- Choosing foods that are low in fat, saturated fat, and cholesterol and do not contain *trans* fat
- Choosing foods and beverages with little added sugars
- Eating more calcium-rich foods
- Preparing healthy meals and snacks
- Risks of unhealthy weight control practices
- Accepting body size differences
- Food safety
- Importance of water consumption
- Importance of eating breakfast
- Making healthy choices when eating at restaurants
- Eating disorders
- [The Dietary Guidelines for Americans](#)
- Reducing sodium intake
- Social influences on healthy eating, including media, family, peers and culture
- How to find valid information or services related to nutrition and dietary behavior
- How to develop a plan and track progress toward achieving a personal goal to eat healthfully
- Resisting peer pressure related to unhealthy dietary behavior
- Influencing, supporting, or advocating for others' healthy dietary behavior

III. Physical Activity

Children and adolescents should participate in at least 60 minutes of physical activity every day. A substantial percentage of students' physical activity can be provided through a comprehensive school physical activity program (CSPAP). A CSPAP reflects strong coordination and synergy across all of the components: quality physical education as the foundation; physical activity before, during and after school; staff involvement and family and community engagement and the district is committed to providing these opportunities. Schools will ensure that these varied physical activity opportunities are in addition to, and not as a substitute for, physical education (addressed in "Physical Education" subsection).

Physical activity during the school day (including but not limited to recess, classroom physical activity breaks or physical education) **should not be withheld** as punishment. *This does not include participation on sports teams.* The district will provide teachers and other school staff with a [list of ideas](#) for alternative ways to discipline students.

Recess Guidance: <http://education.ky.gov/CommOfEd/fri/Pages/February-26-2016.aspx>

To the extent practicable, the District will ensure that its grounds and facilities are safe and that equipment is available to students to be active. The District will conduct necessary inspections and repairs.

Physical Education

The District will provide students with physical education, using an age-appropriate, sequential physical education curriculum consistent with national and state standards for physical education. The physical education curriculum will promote the benefits of a physically active lifestyle and will help students develop skills to engage in lifelong healthy habits, as well as incorporate essential health education concepts (discussed in the "*Essential Physical Activity Topics in Health*")

Education” subsection). The curriculum will support the essential components of physical education. The school district should offer continued professional development opportunities that are focused on education/physical activity and competencies specifically for physical education teachers and when possible physical education should be taught by a licensed teacher.

The school district will discourage students from substituting other school or community activities for physical education class. Unless otherwise exempted, all students will be required to engage in the District’s physical education program. All students will be provided equal opportunity to participate in physical education classes. The District will make appropriate accommodations to allow for equitable participation for all students and will adapt physical education classes and equipment as necessary.

All District **elementary students** in each grade will be encouraged to receive physical education/activity for at least 150 minutes per week throughout the school year.

All District **secondary students** (middle and high school) are recommended to take the equivalent of one academic year of physical/health education and encouraged to receive 225 minutes of physical activity/education each week.

The District physical education program will promote and encourage student physical fitness through individualized fitness and activity assessments (via the [Presidential Youth Fitness Program](#) or other appropriate assessment tool) and will use criterion-based reporting for each student.

Essential Physical Activity Topics in Health Education

Health education will be required in all grades (elementary) and the district will require middle and high school students to take and pass at least one health education course. The District will include in the health education curriculum a minimum of 12 the following essential topics on physical activity:

- The physical, psychological, or social benefits of physical activity
- How physical activity can contribute to a healthy weight
- How physical activity can contribute to the academic learning process
- How an inactive lifestyle contributes to chronic disease
- Health-related fitness, that is, cardiovascular endurance, muscular endurance, muscular strength, flexibility, and body composition
- Differences between physical activity, exercise and fitness
- Phases of an exercise session, that is, warm up, workout and cool down
- Overcoming barriers to physical activity
- Decreasing sedentary activities, such as TV watching
- Opportunities for physical activity in the community
- Preventing injury during physical activity
- Weather-related safety, for example, avoiding heat stroke, hypothermia and sunburn while being physically active
- How much physical activity is enough, that is, determining frequency, intensity, time and type of physical activity
- Developing an individualized physical activity and fitness plan
- Monitoring progress toward reaching goals in an individualized physical activity plan
- Dangers of using performance-enhancing drugs, such as steroids
- Social influences on physical activity, including media, family, peers and culture
- How to find valid information or services related to physical activity and fitness
- How to influence, support, or advocate for others to engage in physical activity

- How to resist peer pressure that discourages physical activity.

Recess (Elementary)

All elementary schools will be encouraged to offer at least **20 minutes of recess** on all days during the school year. This *policy may be waived on early dismissal or late arrival days*). If recess is offered before lunch, schools will have appropriate hand-washing facilities and/or hand-sanitizing stations located just inside/outside the cafeteria to ensure proper hygiene prior to eating.

Outdoor recess will be offered when weather is feasible for outdoor play.

In the event that the school or district must conduct **indoor recess**, teachers and staff will follow the indoor recess guidelines that promote physical activity for students, to the extent practicable.

Recess will complement, not substitute, physical education class.

Classroom Physical Activity Breaks (Elementary and Secondary)

The District recognizes that students are more attentive and ready to learn if provided with periodic breaks when they can be physically active or stretch. Thus, students should be encouraged to take **periodic opportunities** to be active or to stretch throughout the day on all or most days during a typical school week. The District recommends teachers provide short (3-5-minute) physical activity breaks to students during and between classroom times at least three days per week. These physical activity breaks will complement, not substitute, for physical education class, recess, and class transition periods.

The District will provide resources and links to resources, tools, and technology with ideas for classroom physical activity breaks. Resources and ideas are available through [USDA](#) and the [Alliance for a Healthier Generation](#).

Active Academics

It is recommended that teachers incorporate movement and kinesthetic learning approaches into “core” subject instruction when possible and do their part to limit sedentary behavior during the school day.

The District will support classroom teachers incorporating physical activity and employing kinesthetic learning approaches into core subjects by providing annual professional development opportunities and resources, including information on leading activities, activity options, as well as making available background material on the connections between learning and movement.

Teachers will serve as role models by being physically active alongside the students whenever feasible.

Before and After School Activities

The District offers opportunities for students to participate in physical activity either before and/or after the school day (or both) through a variety of methods. The District will encourage students to

be physically active before and after school. Students that live within a short distance from the school are encouraged to walk or bike to school using provided sidewalks.

IV. Other Activities that Promote Student Wellness

The District will integrate wellness activities across the entire school setting, not just in the cafeteria, other food and beverage venues and physical activity facilities. The District will coordinate and integrate other initiatives related to physical activity, physical education, nutrition and other wellness components so all efforts are complementary, not duplicative, and work towards the same set of goals and objectives promoting student well-being, optimal development and strong educational outcomes. Teachers are promoted to take physical activity breaks when classroom environment allows.

Schools in the District are encouraged to coordinate content across curricular areas that promote student health, such as teaching nutrition concepts in mathematics, with consultation provided by either the school or the District's curriculum experts. Criteria for selecting educational materials for the classroom shall be expanded to include review of advertising content. Every effort will be made to select materials free of brand names/logos and illustrations/promotion of unhealthy foods. All ads should be approved by the principal before being printed or included on the school material or website.

All efforts related to obtaining federal, state or association recognition for efforts, or grants/funding opportunities for healthy school environments will be coordinated with and complementary of the wellness policy, including but not limited to ensuring the involvement of the DWC/SWC.

Marketing

In an effort to promote healthy eating/ education it is strongly discouraged to advertise or display unhealthy foods on school grounds. It is encouraged that all existing vending machines and coolers promote healthy options when possible. It is also recommended that schools avoid participation in fundraising or incentive programs that promote a message that is inconsistent with the goals of the wellness policy.

Community Partnerships

The District will continue relationships with community partners (e.g., hospitals, universities/colleges, local businesses, cooperative extension, Healthy Kid's Clinic, SNAP-Ed providers and coordinators, etc.) in support of this wellness policy's implementation. Existing and new community partnerships and sponsorships will be evaluated to ensure that they are consistent with the wellness policy and its goals.

Community Health Promotion and Family Engagement

The District will promote to parents/caregivers, families, and the general community the benefits of and approaches for healthy eating and physical activity throughout the school year. Families will be informed and invited to participate in school-sponsored activities and will receive information about health promotion efforts.

Staff Wellness and Health Promotion

The DWC and the district health coordinator, identifies and disseminates wellness resources and performs other functions that support staff wellness in coordination with human resources staff. Schools in the District will implement strategies to support staff in actively promoting and modeling healthy eating and physical activity behaviors.

The District promotes staff member participation in health promotion programs and will support programs for staff members on healthy eating/weight management that are accessible and free or low-cost.

Professional Learning

When feasible, the District will offer annual professional learning opportunities and resources for staff to increase knowledge and skills about promoting healthy behaviors in the classroom and school (e.g., increasing the use of kinesthetic teaching approaches or incorporating nutrition lessons into math class). Professional learning will help District staff understand the connections between academics and health and the ways in which health and wellness are integrated into ongoing district reform or academic improvement plans/efforts.

Glossary:

Extended School Day – the time during, before and after school that includes activities such as clubs, intramural sports, band and choir practice, drama rehearsals and more.

School Campus - areas that are owned or leased by the school and used at any time for school-related activities, including on the outside of the school building, school buses or other vehicles used to transport students, athletic fields and stadiums (e.g., on scoreboards, coolers, cups, and water bottles), or parking lots.

School Day – the time between midnight the night before to 30 minutes after the end of the instructional day.

Triennial – recurring every three years.
